**Trusted and reliable Roofing Product
from Mabati Rolling Mills Limited**

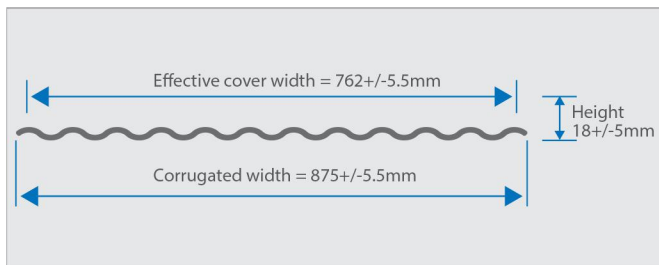

Resincot is a unique brand that offers coating of Aluminum-Zinc protective alloy on a carbon steel base which is pre-painted in controlled factory conditions. It promises durability and is available in over 16 different colours making it the obvious choice of architects and designers with a bias for class and aesthetics. Resincot features five year fade free warranty. The Aluminium- Zinc coated base offers an extremely long life.

Features and Benefits

- Aluminum-Zinc alloy offers extra corrosion resistance lasting two times longer than ordinary colour coated roofing sheets.
- Superior quality of paint-systems allows MRM to offers fade free warranties of between 5 years-15 years.
- Available in a variety of colours to suit a client's style with the option to customize.
- Customized lengths- tailor made to customer requirements. Less joints hence minimal chances of leakage; more economical owing to less wastage.
- Available matching accessories offers a truly total roofing solution that is in complete harmony with itself.

Specifications

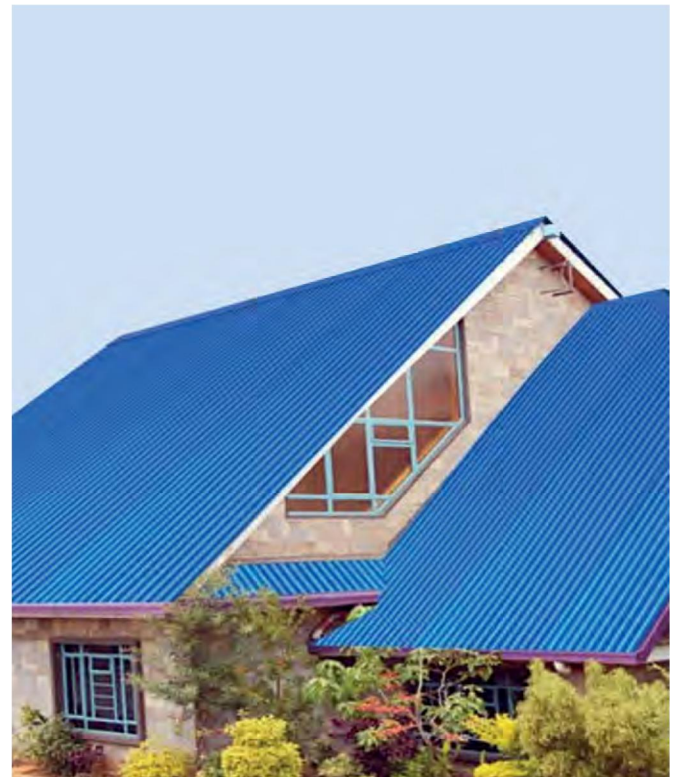

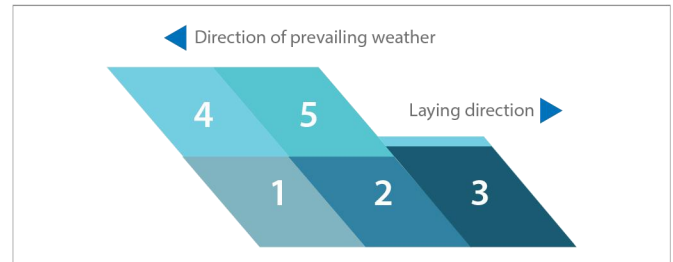

Purlin Spacings

Purlin Spacings are dependent on both downward loading and negative suction loading caused by wind. Your engineer should be consulted to calculate your load [kN/m²] for your particular application.

Fixing Procedure

Lay each run of sheets in turn from side to side before moving onto the next run as depicted below. Similar procedure for wall cladding too.
